SAWGRASS COUNTRY CLUB CLUBHOUSE

SIZE

67,100 SQ FT

COST

\$20,850,000

ARCHITECT

**PEACOCK + LEWIS
ARCHITECTS**

DESCRIPTION

Auld & White Constructors was retained by Sawgrass Country Club to construct a new 67,100 sq. ft. clubhouse in Ponte Vedra, Florida. The project was constructed strategically in phases to allow parts of the former facility to remain operational while the new facility was being constructed adjacent to it. As the first half of the new portion was complete, the remaining portion of the former facility was demolished to make way for the new building's main entrance. With modern new amenities and casual but elegant spaces, guests can now enjoy the relaxing surroundings of one of the Southeast's Premier Private Country Clubs. Members can visit the new Pro Shop with the latest men's and women's golf apparel, enjoy a meal in the grand dining spaces, or relax in the luxurious men's and women's locker rooms. Regardless of where you venture in the Distinguished 5 Star Platinum Club of America, you will be enjoying the ultimate Sawgrass experience.
